

ALiGN

AESTHETIC DENTAL HUB

WEBSITE & TOKEN-BOOKING SYSTEM · PROJECT OVERVIEW

A website that books patients while the clinic *sleeps*.

A premium, mobile-first website for Dr. Nikita Soni's practice in Bhopal — with online token booking, a live front-desk & doctor screen, a waiting-room display, and Google reviews built in. Prepared for the clinic.

Everything the clinic gets, *in one place.*

A fast, modern website that also runs the day-to-day appointment queue — no monthly software fees, no app to install, and nothing for patients to sign up for.

7

days a week, hours built in

15_{min}

token slots · 32–44 a day

5.0 ★

Google rating, shown live

Online token booking

Patients pick a day and a 15-minute slot in under a minute. Two people can never get the same slot — the database guarantees it.

Live front-desk & doctor screen

Reception and the doctor see every booking the moment it arrives — with a chime, a “now serving” panel and one-tap status.

Waiting-room display

A big “Now serving” screen for a TV or tablet — token numbers only, no names, updating on its own.

Google reviews, built in

A rating summary and a swipeable review carousel, pulled from the clinic’s own Google profile.

Honest & safe

Only verified facts — no invented reviews, no fake numbers, no fees shown. Patient data is never exposed publicly.

Zero running cost to start

Built on free tiers (hosting + database). No monthly booking-software subscription.

Designed for the practice, *not from a template.*

A custom “alignment” theme built around orthodontics: on the home page, crowded teeth glide into a perfect arch as the visitor watches — the same idea as braces and aligners. Porcelain & emerald colours, tuned to the clinic’s own signboard.

Meet the doctor page

Dr. Nikita Soni

BDS, MDS (Orthodontics & Dentofacial Orthopaedics). Her degrees, certificates and continuing education are all shown — every fact taken from real documents, nothing embellished.

- ✓ Interactive smile-alignment hero animation
- ✓ Real clinic & equipment photography throughout

Every page a patient needs

Home, Treatments (8 detailed pages), Technology, About Dr. Nikita, Clinic gallery, Reviews, and Visit with a live map and today’s hours highlighted.

The “instrument tray”

The clinic’s actual equipment — intraoral camera, dental laser, digital X-ray, endo motor and more — each with what it is and what it means for the patient.

Built for phones first

Most patients arrive from a phone. Every page is tuned for mobile, loads fast, and works with one thumb.

Found on Google

SEO for “dentist / orthodontist in Bhopal”, structured data for Google, a sitemap, and fast, optimised images.

ALIGN ASSISTANT

A friendly chat that answers the common questions

Timings, directions, treatments and “how do I book?” — answered instantly, in the visitor’s language. It never gives medical advice and always points to a consultation.

A real queue, run from any screen.

The booking system replaces the paper register — the front desk and the doctor see the same live list, and patients keep their own token without anyone typing it into WhatsApp.

For the patient

- ✓ **Book in under a minute** — day, time, name, mobile.
- ✓ **Token saved automatically** on their phone — no code to remember.
- ✓ **Keep it their way** — save as an image, add to calendar, share, SMS, or print.
- ✓ **Check or cancel** any time from “My token”.

For reception & the doctor

- ✓ **Live updates** with a chime and a “now serving” panel.
- ✓ **One tap** to mark Seen, No-show or Cancel.
- ✓ **Find any patient** by mobile, name or code — any date.
- ✓ **Add walk-ins**, print the day’s list, passcode-protected.

Patients already say it best.

★★★★★

“Dr. Nikita Soni is wonderful — very calm, attentive and thorough. The entire experience was smooth and pleasant. Highly recommended!”

— Sherlz Paradise · Google

★★★★★

“Explained everything clearly, answered all my questions patiently, and made me feel comfortable throughout. I highly recommend Dr. Nikita Soni and the team!”

— Divya Sahu · Google

Live on the site: 5.0 out of 5 across 8 Google reviews, shown in a swipeable carousel with links to read all and write a review.

Fast, reliable, and yours.

Built on the same modern technology used by leading product companies, so the site stays fast, secure and easy to maintain.

Framework	Next.js 16 · React 19	✓ Secure by design — no patient data exposed publicly
Hosting	Vercel (global, auto-scaling)	✓ Double-booking impossible at the database level
Database	Turso — durable, cloud SQLite	✓ Works even on slow connections
Reviews	Google Business Profile / Places	✓ Accessible & keyboard-friendly

Ready to grow when you are.

SMS confirmations

Automatic booking SMS to patients (needs an SMS provider & DLT registration).

All Google reviews

Auto-sync every review via the Business Profile API, replies included.

Custom domain & email

Point your own domain and set up a matching clinic email.

READY TO GO LIVE

The site is built, tested and waiting on the final switch-on.

Everything shown here works today. Turning on live bookings takes only the clinic's hosting keys. We're happy to walk you through it and hand over full access.
